

## WAN Acceleration

ONLY VPN EVER WHICH IS FASTER THAN CLEAR TRAFFIC EVEN AFTER DATA ENCRYPTION, 30 X FASTER, 2 SECONDS LOGIN TIME, 4 GBPS SSL VPN THROUGHPUT

Most of the company's uses legacy IPsec VPN to connect remote locations, to create Wide Area Network or connect roaming work force which results into lot of configuration issues, support calls and provide week security. AccelPro provides the next generation VPN gateways which make deployment easy, no support calls and a unified approach for secure remote access. SSL VPN's came into the market to address the emerging need of Secure Remote Access with ease, but due to the fundamental flaw in their design and approach injected unwanted performance degradation. This unacceptable performance degradation in the existing SSL VPN's stopped the growth of SSL VPN as a technology in the market. SSL VPN was a more superior technology than IPsec VPN and having lots of advantages like Client Less Access, Can virtually bypass any firewall, provides all applications access on a single port (443), Granular Access Control till the application layer, easy to manage, Zero support calls, auto updating clients and many more. But due to performance degradation it could not scale up as a default industry standard in spite of all those advantages. While in the case of AccelPro, having Core SSL Engine, HPAA and Optimized Compression which results in ultra-high performance, along with all the benefits of SSL VPN, makes AccelPro the Next Generation VPN.

### HPAA™

Powered with Innovative HPAA™ patent pending technology, AccelPro platforms delivers accelerated performance, resulting into WAN Acceleration solution in Client-Server architecture. AccelPro platforms provides 30 times faster Remote Access making AccelPro SSL VPN the Next Generation of VPN. AccelPro SSL VPN series is equipped with a unique Client Agent, which is powered with HPAA™ technology, enabling 2 seconds Client Login time and able to get a Virtual Private IP from the SSL VPN Gateway within the same time, giving remote user a LAN like feel, resulting in amazing end user experience.

### High Performance VPN

AccelPro, right from its inception, solved fundamental problem in existing SSL VPN's, delivering most performing SSL VPN Ever. While other SSL VPN's merely provides access to web applications and intranet portals, but fails to meet fast remote access to client-server applications and other network resources. The performance degradation in other SSL VPN limit them as SMB solution. While AccelPro platforms are carrier class products, providing high scalability and accelerated throughput around 30 X faster, meeting the requirements of Enterprise and ISP customers.

## High Scalability

AccelPro range of products provide scalability starting from 50 simultaneous users to 20,000 simultaneous users on single hardware meeting needs of a small business to large Enterprise house to ISP or Service Provider. Performance and fast client login time makes AccelPro platforms unique and different from other products, addressing much needed requirement for faster remote access without compromising on the security of the networks. With unique HPAA™ technology, AccelPro platforms are able to deliver throughput faster than clear traffic even after the encryption of data packets. AccelPro sells APG-700, 1400, 2800, 5600, 6200 Appliances along with advanced Virtual SSL VPN Appliance which can run on VMware.

## Increased User Productivity

Helping user to get securely connected with their organization network from Anywhere, Anytime and Anymachine. AccelPro solution, provides Strong Authentication, Encrypted Data Packets, Role Based Access Controls, Automatic Network Access Controls, Application Execution Controls, Endpoint Compliance and Complete User Reporting. All with the ease of creating and managing from central location and auto-updating Client Agents.
